CIB Co-Sponsored Call for Abstracts BEYOND 2020, World Sustainable Built Environment (WSBE) Conference

On 9th – 11th June 2020 Gothenburg (Sweden) will host the next edition of the World Sustainable Built Environment conference (WSBE 2020), called BEYOND 2020. The conference is organised by Chalmers University of Technology and RISE (Research Institutes of Sweden), with the support of Johanneberg Science Park and Gothenburg City.

The overall ambition of the World Sustainable Built Environment conference, BEYOND 2020 is to collectively formulate a transformational plan and set of commitments for the built environment to support the implementation of the UN Sustainable Development Goals.

Call for Abstracts

The call for abstracts is now open until:
31st July 2019.

More information about the abstract submission is to be found [here](#).

BEYOND 2020 is centred around goal number 11 "Sustainable Cities and Communities" as the focal point to deliver and apply solutions for a more sustainable built environment.

Around goal number 11, we have identified 10 other goals that are strongly related to goal 11 and these are highly aligned by stakeholders and activities in the built environment with the achievement of 'sustainable cities and communities'.

The Scientific Committee is seeking contributions addressing identified challenges and demonstrating innovations that begin to solve these challenges.

Sponsorship opportunities

As part of the renowned SBE conference series, the conference BEYOND 2020 also offers unique sponsorship opportunities for building sustainability leaders as well as great international exposure.

More information about sponsorship is to be found [here](#).

Information & Contacts
