New CIB Research Roadmap W096 – Architectural Design and Management

ISBN: 978-90-6363-095-9

Introduction

The CIB Commission, W096 – Architectural Design and Management, published this Research Roadmap, and has presented this during the World Building Congress in Hong Kong that took place in June.

This Research Roadmap aims to establish the principal issues in Architectural Design and Management. It is an advance for architectural research to be organised in this way. It addresses the six themes:

- Conceptual Framework
- State of the Art
- Future Scenario
- Development Strategy
- Research Contribution
- Research Agenda

This Research Roadmap is arguably the first coherent presentation of a Conceptual Framework, State of the Art, Future Scenario, Development Strategy, Research Contribution, and Research Agenda for Architectural Design and Management. It sets out the scope for research and innovation and suggests how this may receive more prominence on the international stage.

Availability

The Publication is electronically available for free from the CIB website [here](#).

The publication will also be available for free via the ICONDA@CIBlibrary in the near future. Other Research Roadmaps are available via [this link](#).

Contact details

For additional information about CIB Commission W096 contact one of the Coordinators:

Prof. Bob Giddings
Northumbria University
